

Seokhee Jo

AI Researcher

joseokhee44@gmail.com · Seoul, Korea
joseokhee.github.io

RESEARCH INTERESTS

Representation learning, self-supervised learning, medical image analysis

EDUCATION

M.S. in Computer Science and Engineering, Sogang University

Mar 2021 – Feb 2024

Advisor: Prof. Jungmin So · GPA 3.68/4.5

Thesis: Supervised Contrastive Learning with Importance-based CutOut for Few-shot Image Classification

B.S. in Computer Information Engineering, Inha Technical College

Mar 2017 – Feb 2021

GPA 4.2/4.5

PUBLICATIONS

- Seokhee Jo**, Jungmin So. “Supervised Contrastive Learning with Importance-based CutOut for Few-shot Image Classification.” *ACM/SIGAPP Symposium on Applied Computing (SAC)*, 2025. **ORAL**
- Seokhee Jo**, Kyu Cheol Cho. “Multi Cycle Consistent Adversarial Networks for Multi Attribute Image to Image Translation.” *Journal of the Korea Society of Computer and Information*, 25(9), 63–69, 2020.

RESEARCH EXPERIENCE

AI Researcher, JLK Inc.

Jan 2024 – Present

- Chest X-ray lesion detection with a foundation model**
Replaced the backbone with CheXFound and added a module to better separate lesion features.
- Malignant calcification detection in mammography**
Retrained the model to focus on malignant calcifications for a hospital deployment.
- Chest X-ray screening (fibrosis, cardiomegaly, arterial calcification, scoliosis)**
Developed detection models now used in health screening centers across Korea.

Graduate Researcher, Intelligent Connected Systems Lab, Sogang University

Nov 2021 – Dec 2023

- Few-shot image classification**
Proposed importance-based CutOut with supervised contrastive learning (SAC 2025).
- Contextual bias in object recognition**
Worked on a copy-paste augmentation using object co-occurrence statistics (team project).

TEACHING

Programming Instructor, Beyond Coding

May 2021 – Jan 2024

Taught programming (C, Python, Java, web)

SKILLS & CERTIFICATIONS

Programming	Python, PyTorch, CUDA
Language	Korean (native), English (TEPS 356, 2026)
Certification	Engineer Information Processing, HRD Korea (2020)
